

The Allen County Regional Transit Authority requested one replacement bus in FY08. The cost of the bus will be \$300,000 at 100% CMAQ funding. The replacement bus will be 30 ft. or greater in length and include an electronically controlled diesel engine. These engines are capable of burning ultra-low sulfur diesel fuel, which will significantly reduce emissions. This vehicle will be able to carry at least 28 passengers. This transit vehicle will replace a 1993 Gillig 30 ft low floor bus with an average 120 miles per day of travel.
